## DETAILED ACTION

### ***Specification***

The incorporation of essential material in the specification by reference to an unpublished U.S. application, foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference, if the material is relied upon to overcome any objection, rejection, or other requirement imposed by the Office. The amendment must be accompanied by a statement executed by the applicant, or a practitioner representing the applicant, stating that the material being inserted is the material previously incorporated by reference and that the amendment contains no new matter. 37 CFR 1.57(f).

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-16 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. In particular, these claims recite an algorithm and do not provide a practical application; i.e. they do not result in a physical transformation or provide a useful, concrete, and tangible result (e.g. displaying the final estimated tempo).

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wang et al, Lu et al, Thomson et al, Weare, Weissflog, Laroche, and Yamada et al are further cited to show related teachings in the art.
